

Montem Primary School

Spheretech Ltd design and install heating, cooling and ventilation equipment into offices, retail, schools, universities medical practices and factories throughout the UK.

One particular area of expertise is the education sector, as we know that reducing energy bills for heating and cooling are of the utmost importance in schools, universities and colleges.

Spheretech Ltd now has over 250 customers in the education sector. One such customer, Montem Primary School, appointed Spheretech as their ageing heating system was affecting heating efficiency in one of their school blocks.

Our solution was to install an eco friendly air conditioning solution to provide fast, cost effective heating to the affected classrooms with the minimum of disruption. We ensure that any installation is completed with the absolute safety to children and staff in mind and the minimum of disruption to the school's routine.

Since installation, the customer has been delighted with the speed to warm up the affected classrooms and the reduction in their heating running costs. The results of the first phase of this project encouraged the School to review all their heating systems.

By replacing inefficient oil fired boilers at Montem School with an Energy Technology List approved VRF heating and cooling system, we delivered the school massive fuel and CO2 savings.

Most schools use our 'A-A' energy rated equipment that can considerably reduce energy consumption.

Spheretech replace Montem Primary School's ageing Heating System

As with all Spheretech installations, we arrange an initial free, no obligation survey to assess the customer's requirements and to provide a forum to answer any questions.
