

## Customer Case Study

# The Orchard Day Nursery

Spheretech Ltd specialise in designing and installing heating, cooling and ventilation equipment into offices, retail, schools, universities medical practices and factories throughout the UK.

In the past 12 months we have been asked by a number of customers in the children's day care sector, to assist them by installing energy and cost efficient heating systems.

With rising energy costs, many businesses are seeking ways of delivering energy and cost efficient solutions to heat and cool their premises. Recently, The Orchard Day Nursery in Dorset appointed Spheretech to install heating and cooling wall mounted systems to replace their ageing and inefficient convector heating units.

The system we designed required quick and even air distribution with minimum installation disruption, high energy efficiency to reduce heating bills and costings within a sensible budget.

Since installation, the customer has been absolutely delighted with the speed to warm up their building. They have commented on how quiet and extremely efficient our system delivers heating to their activity rooms.

"Your visit to our nursery helped answer all my queries and concerns, I felt that I was receiving a very personal service and that you were trying to give us the best solution for our heating and cooling needs"

**Debbie Appleby** Orchard Day Nursery

### Debbie Appleby, Director of Orchard Day adds

"Your installation team were punctual, polite, professional and accommodating. They communicated their plans for the day each morning and were flexible around the needs of the children's routines and needs. They worked neatly and cleared up after themselves and worked until 9pm on the first day just to help speed the installation along."

As with all Spheretech installations, we arrange an initial free, no obligation survey to assess the customer's requirements and to provide a forum to answer any questions.
